

WX-26x

A Wiz-eXtender Product

- 5 port 10/100 outlet switch, 4x RJ45 and one IDC (Krone type) network port
- Integrates into office & home 45x45 outlet systems and standard in-wall mounting boxes
- Efficient, Effective and Elegant 1:4 port extender and bandwidth aggregator
- DC operated, 5VDC or PoE/48VDC
- Supports auto negotiation & auto crossover
- IEEE802.3af Power over LAN (PoE) support, PD or PD/PSE models
- Simple, Plug & play installation and operation

The WX-26x are outlet LAN extender switches, providing multiple network access ports at the desk, using a single outlet infrastructure. WX-26x integrates into the room's outlet design.

Connected over a single UTP/STP cable to the network, supporting PoE and mounted in a single 45x45 outlet plate the WX-26x provide efficient, effective and elegant solution for multiport and PoE access point. WX-26x utilize the existing or newly installed single network port.

The need to extend the number of network access ports and the advantages of PoE at the desk are common requirement in today's office and home environments.

The WX-26x models offer variety of power/PoE options:

WX-260 powered by an external universal power adaptors 5VDC (WX-PS) mounted in an adjacent 45x45 outlet plate.

WX-261 is a PoE-PD device powered through the network port or 48VDC EPS.

WX-262 is a PoE - PD/PSE device powered through the network port and supports PoE on two of the user's ports, capable of connecting one class 2 or two class 1 PoE devices.

The WX-26x are simple to install plug & play devices that use IDC connector (Krone type) for fast network connection.
