

SlimWire Ultra7 - The Next Generation

SlimWire Ultra7 is the most powerful and modern patch cable in the SlimWire family. The shielded, highly flexible CAT7 cable offers maximum network speed and performance for connecting VoIP telephones, access points, routers and many other devices. SlimWire Ultra 7 supports 10Gigabit Ethernet and is suitable for PoE applications (IEEE802.3af/at/bt) up to 90W. With its ultra-flat cross-section, SlimWire can be laid behind skirting boards, under carpets, laminate or wallpaper, as well as through windows and doors.

- CAT7 STP shielded Twisted Pair Flat Cable
- Extremely small cable cross-section of just 7.2 x 2.2 mm
- Maximum transmission frequency: 600 MHz
- Serial number printed on both cable ends for easy identification
- High voltage test at DC 1000V for 1 minute
- UL certification
- Complies with fire class CM
- 100% electrical testing of all cables for open circuits, short circuits, and miswiring
- All materials, including packaging, are RoHS/REACH/CE compliant
- Operating temperature: -40° to +70°C
- Installation temperature: -5° to +70°C
- Suitable for up to 10-GBit Ethernet
- Suitable for PoE (IEEE802.3af/at/bt) up to 90W
